

## **DRUM JACK NO.2**

## **FULL COIL AND MEASURE LINE**

Our Standard Coil & Measure Line assists with the decoiling of mother drum. The measure head and guide roller assist with the decoiling to specific lengths of cable, rope or hose. The measure head can handle 5mm to 30mm dia cable or tube and has a mechanical reset to zero.

It is based on a four wheel trolley pallet which allows easy movement in warehouses. It has two attachments, one spool for coiling single spools of cable, rope or hose and the other attachment has a drum attachment with centring cones for coiling from drum to drum.

## **DRUM JACK NO.2**

## **SHORT COIL AND MEASURE LINE**

Our Short Coil & Measure Line assists with the decoiling of the mother drum. The measure head and guide roller assists with the decoiling to specific lengths of cable, rope or hose. The measure head can handle 5mm to 30mm dia cable or tube and has a mechanical reset to zero.

It is based on a four wheel trolley pallet which allows easy movement in warehouses. It has one spool attachment for coiling single spools of cable, rope or hose.
