Pull latch out to wind down the drum spindle to its load position. For transport of drum, wind up the drum and lock into position.

Friction winch – wind up to lift and wind down to lower drum.

Ensure trailer is attached to tow vehicle when loading or unloading the drums and lower back jacks to 50mm from the ground when loading the drum. Ensure the jacks are lifted and the trailer brake is released before towing.

Drum trailer with drum raised ready for transportation.

As a new addition to our cable hauling equipment this single axle drum trailer has a lifting capacity of 1 ton. The trailer can accept a single drum dimension of 1600mm dia and 1500mm width, the drum would need to be locked into place by spacer locks that are supplied. This drum trailer will also accept multiple drums (eg. mains & pilot). Note the total overall weight of the multiple drums cannot exceed the 1 ton weight capacity.
