

## BRUSHES

Powerhowse Electric supplies a range of equipment for your conduit needs. Our Brushes are used to clean and remove dirt and other loose debris from ducts or conduits. Proudly New Zealand made, all our brushes are provided with $2 \times 12 \mathrm{~mm}$ Shackles, one shackle for pulling into the duct the other to pull back if the brush jams. It is advised to use two ropes when cleaning the duct to prevent the risk of the Brush getting stuck. Our range includes steel wire, half steel/half nylon stiff nylon and soft nylon, all in different sizes to suit the duct diameters from 50 mm to 200 mm .

We also have proving pigs, squeegee etc available at Powerhowse Electric.

WIRE STIFF
Steel Wire Brush c/w Pulling Eyes on both

## NYLON STIFF

Stiff Nylon Brush c/w Pulling eyes on both

## WIRE/NYLON

Steel Wire/Nylon Brush c/w Pulling eyes on both ends
