

# WINCHES

**500kg Rated Winch**

**1 Ton Rated Winch**

**2 Ton Rated Winch**

Each of our Petrol Capstan Winches have a different hauling rating and each come with 2 different size capstans for either more Torque or Speed. Capstan winches allow you greater control over the Pull as you can feel the tension being applied. A Crane Scale (Dynamometer) can be placed between the anchoring point and the Winch to show haul tensions and all Winches come with an A-Frame anchor.

**IMPORTANT – CAPSTAN WINCHES ARE NOT TO BE USED FOR VERTICAL LIFTS.**
