813014	Timberland 6707 Series Cross Arm Roller	310 x 160 x 130	4.5kgs

Timberland 6707 Series Cross Arm Roller

This versatile Cross Arm Roller can be mounted on or hung from a cross arm. The roller has 2 parts to it, the base that mounts onto the cross arm and the roller that fits into the base. The base allows the roller to be mounted as either a straight or angle roller. If roller is only required for hanging purposes, then the mounting bracket is not required.

CROSS ARM ROLLERS

Duo or Single Cross Arm Roller can be supplied with or without Heli Horn

Available single or duo rollers, they can either be mounted on top of the cross arm with a ratchet belt or hung below the cross arm with a hanging eye. They can be used with or without the Heli Horn.
