

ROPE

Duradan Rope

Is an excellent all-purpose rope, available in a range of sizes from 3mm to 48mm. Lengths of rope vary from 110m to 1000m. Made from blending Polypropylene & Polyethylene resins.

Superdan Rope

This rope has superior strength with excellent abrasion resistance. The rope is flexible, doesn't rotate or kink, it is easily handled and fully functional to splice. Available in longer lengths than the Duradan.

DYNICE Rope

This rope exceeds the strength of steel wire ropes of same diameter & can float on water. They have low elongation and are extremely flexible, easy to handle and available in long lengths.

Please contact us for Supertuff or Winchline options
