

SAHLINS TRAILERISED WINCHES

Powerhowse Electric imports and supplies a range of different types of Trailerised Winches that are towable and hydraulically operated with variable pulling speed and force. Available to purchase or to hire.

3 Ton Trailerised Sahlins Winch

This 3T rate Towable Trailerised Winch is a hydraulically operated winch with variable pulling speed and force. The Winch has 700m of 12mm wire rope built into it for hauling. You can set a maximum pull force before you start your haul and if your haul reaches that weight the winch will stop hauling. This winch also has a tension recorder built into it so at the end of the haul you can download the pulling tension for entire haul.

Operation: Easy operation of in/out, speed and gas. The manometer also allows you to set the maximum power limit (red pointer) if needed.

Wire: 1000m x 10mm

Overhead Cable Winch 2241

An overhead cable winch driven by a petrol driven hydraulic power pack. A winch with variable control of the pulling force and drum speed and is equipped with a negative brake function that prevents the line running out when stopped. The Line Machine 2241 features an integrated cooling fan that provides good oil cooling, even with extended and demanding usage.

Features: The drive source is a petrol-powered hydraulic Power Pack, and all controls are located on the left side of the machine. It is easy to both load and unload the drum, with three positions on the drum frame to guarantee the balance of the machine during operation and transport – with or without drums.

CODE	DESCRIPTION	DIMENSIONS L x W x H	WEIGHT
30356	3 Ton Rated Towable Trailerised Winch	3570 x 1835 x 1350	1600kg
2241-0001	Overhead Cable Winch 2241	3500 x 2240 x 2240	980kg
